

Edenseek Scout Project Charter

Project Name

Edenseek Scout

Mission

Edenseek Scout is an always-on AI research agent designed to monitor developments relevant to Edenseek Publishing and its technology initiatives, synthesize strategic intelligence, maintain institutional memory, and assist in the development of AI-powered publishing tools.

Scout serves as the first autonomous component of the broader Edenseek AI ecosystem.

Vision

Create a persistent AI intelligence layer that continuously learns about:

- Artificial Intelligence
- Publishing
- Comics
- Storytelling technology
- Creator tools
- Edenseek internal projects

and transforms this information into actionable strategic guidance.

Strategic Goals

Short-Term Goals

- Generate autonomous daily reports
- Maintain persistent memory
- Provide a web dashboard
- Support basic strategic analysis

Mid-Term Goals

- Monitor external news sources
- Maintain an Edenseek knowledge base

- Identify recurring opportunities and risks
- Track long-term themes

Long-Term Goals

- Become a full Edenseek Research Assistant
 - Support Phrasmos development
 - Support Caelaris development
 - Power AI-assisted comic navigation
 - Provide conversational access to Edenseek knowledge
-

Core Users

Primary:

- Derek Uskert
- Edenseek Publishing

Future:

- Editors
 - Writers
 - Artists
 - Readers
 - Publishing partners
-

Current Architecture (v0.3)

Dashboard ↓ FastAPI ↓ Scout Agent ↓ OpenAI ↓ Markdown Reports

Scheduler ↓ Scout Agent

Memory.json ↓ Scout Agent

Success Criteria

Scout is considered successful when it can:

1. Operate continuously without supervision
2. Maintain persistent strategic memory
3. Monitor external information sources

4. Identify opportunities and risks
 5. Support Edenseek business decisions
 6. Assist users through conversational interaction
-

Product Roadmap

v0.3

- Dashboard
- Scheduler
- Persistent Memory

v0.4

- Web Intelligence
- News Monitoring
- Source Collection

v0.5

- Strategic Memory
- Theme Tracking
- Opportunity Tracking
- Risk Tracking

v0.6

- Edenseek Knowledge Base

v0.7

- RAG Integration

v0.8

- Conversational Scout

v1.0

- Oracle VM Deployment
 - Always-On Operation
 - Production Readiness
-

Long-Term Strategic Role

Scout is intended to become the central intelligence layer for the Edenseek ecosystem, supporting publishing, AI development, creator tooling, symbolic metadata systems, and future Edenseek products.
